Obtain just the right fluid temperature for your surgical patients.

The Warmflo® Fluid Warming System applies advanced dry heat technology to obtain the right fluid temperature for your surgical patients. And, the single-use cassette reduces the risk of cross-contamination. Now you have the choice and versatility of two warming cassettes to meet your clinical needs.

**Warmflo® WF-538 Fluid Warmer**

The Warmflo® WF-538 Fluid Warmer is ideal for all routine clinical situations at a wide range of temperature settings—up to 42°C. The dry heat technology of the Warmflo Warming System reduces or eliminates potential infection risks associated with water tank systems.

For added ease-of-use, the WF-250 cassette also comes equipped with a built-in double spike set and a blood filter.

**Warmflo® WF-100 Fluid Warming Cassette**

The Warmflo® WF-100 Fluid Warming Cassette warms fluid at a rate of up to 125 mL/min, while the WF-250 warms fluid at a rate of up to 250 mL/min.
Meet your patient needs and your budget with two choices of Warmflo Fluid Warming Cassettes.

Warmflo FW-538 Fluid Warmer
The Warmflo FW-538 Fluid Warmer* is ideal for all routine clinical situations due to its wide range of temperature settings—up to 42°C. It is designed for use with the Warmflo WF-100 and WF-250 Fluid Warming Cassettes. The FW-538 Fluid Warmer adapts to a standard IV pole for convenience and ease of use.

Warmflo WF-100 and WF-250 Fluid Warming Cassettes
The Warmflo WF-100 Fluid Warming Cassette has a new, streamlined design that delivers normothermic fluid at a flow rate of up to 125 mL/min.

The new Warmflo WF-250 Fluid Warming Cassette warms fluid at a flow rate of up to 250 mL/min. For added ease of use, the WF-250 cassette also comes equipped with a built-in double spike set and a blood filter.

Extended patient lines and a needleless injection port now come standard with the WF-100 and WF-250 cassettes.

For more information contact your local Nellcor sales representative or call 1-800-NELLCOR (1-800-635-5267).

* Winner of the 1999 Engineering Award from Cahners Publication.

For more information, call 1-800-NELLCOR or
**Step One:**
Turn unit on. Slide the Warmflo WF-100 or WF-250 Fluid Warming Cassette into the FW-538 warmer.

**Step Two:**
Close door.

**Step Three:**
Attach the tubing/spike fluid bag. Prime the WF-100 or WF-250 cassette to eliminate air.

---

**Warmflo WM-538 Fluid Warmer**
- Portable design. Attaches to standard IV pole and connects to standard electrical outlet.
- Cassette door
- Single-use cassette reduces risk of cross-contamination.
- Temperature monitor
- Set points determine temperature of fluid at patient entry point.

---

**Easy-to-Use Warmflo Fluid Warming System**

---

**Warmflo WF-250 Fluid Warmer**

The Warmflo WF-250 cassette performance curves with 20°C infusate at three temperature set points compared with Sims Hotline and Augustine Ranger data.

### Product Features
- Excellent performance at low to moderate flow rates. Delivers normothermic fluids at flow rates from 15 mL/min to 250 mL/min.
- Wide temperature range, with warming set points from 28°C to 42°C. Set points determine temperature of fluid at patient entry point.
- Lightweight for easy transport (only 8 lbs).
- Convenient design attaches to standard IV pole and connects to standard electrical outlet.
- Easy maintenance and self-calibrating.
- Dry heat technology reduces or eliminates potential infection risks typically associated with water tank systems.
- Easy-to-use disposable heat exchangers insert like placing a tape into a cassette recorder.
- Easy to clean: two-button access allows for effortless heater plate cleaning.
- Single-use cassette reduces risk of cross-contamination.
